*i **Emerging artists** are usually defined as someone who has "...probably practised as a professional artist continually for less than 5 years but who wishes to develop his or her career in their chosen artform"*

*ii The Australia Council for the Arts has defined a 'serious, practising **professional artist**' in the Don't Give Up Your Day Job report. "The seriousness is judged in terms of a self-assessed commitment to artistic work as a major aspect of the artist's working life, even if arts-related work is not the main source of income. The practising aspect means that we confine our attention to artists currently working or seeking to work in their chosen occupation. The term professional is intended to indicate a degree of training, experience or talent and a manner of working that qualify artists to have their work judged against the highest professional standards of the relevant occupation".*

*iii People experiencing **disability** include "those who have long-term physical, mental, intellectual or sensory impairments which in interaction with various barriers may hinder their full and effective participation in society on an equal basis with others" United Nations Convention on the Rights of Persons with Disabilities 2006.*
